Jürgen H.P. Hoffmeyer-

Zlotnik 2011-06-28 The book

consists of five parts and a

concluding chapter. Part 1

covers general problems

and presents solutions for

the harmonisation of data

and/or cultural contexts. In the second part EUROSTAT and ESOMAR present their established standard instruments. Tested instruments each covering one variable (i.e. occupation, education) are presented in the third part. The fourth part again includes suggested tools for the harmonisation of single variables for which standardised instruments are not yet available (i.e. age, religion, ethnicity,

household, family, income). The last part presents selected empirical analyses demonstrating the use and fruitfulness of instruments presented before. This book is mainly written for two groups. First, researchers and practitioners involved in comparative research in Europe. Second, researchers working with data of the statistical offices of European countries and data from institutions of the European Union.
