The Inner Planets Clark R. Chapman 1977 "America keeps a fine house," Anatol Lieven writes, "but in

its cellar there lives a demon, whose name is nationalism." In this controversial critique of America's role in the world, Lieven contends that U.S. foreign policy since 9/11 has been shaped by the special character of our national identity, which embraces two contradictory features. One, "The American Creed," is a civic nationalism which espouses liberty, democracy, and the rule of law. It is our greatest legacy to the world. But our almost religious belief in the "Creed" creates a tendency toward a dangerously "messianic" element in American nationalism, the desire to extend American values and American democracy to the whole world, irrespective of the needs and desires of others. The other feature, populist (or what is sometimes called "Jacksonian") nationalism, has its roots in an aggrieved, embittered, and defensive White America, centered largely in the American South. Where the "Creed" is optimistic and triumphalist, Jacksonian nationalism is fed by a profound pessimism and a sense of personal, social, religious, and sectional defeat. Lieven examines how these two antithetical impulses have played out in recent US policy, especially in the Middle East and in the nature of U.S. support for Israel. He suggests that in this region, the uneasy combination of policies based on two contradictory traditions have gravely undermined U.S. credibility and complicated the war against terrorism. It has never been more vital that Americans understand our national character. This hard-hitting critique directs a spotlight on the American political soul and on the curious mixture of chauvinism and idealism that has driven the Bush administration.

*Weekly Options for Monthly Income* Jon Schiller, Ph.d. 2015-10-06 Weekly Index Options became available on the Chicago Board of Options Exchange in 2003. I have watched this type of Options Trading evolve as more investors used weekly trading. The trading software I have developed adapted to the weeklies evolution. The software

became simpler: It uses SPX for the weekly options My principle strategy for trading Weekly Index Options uses 2 sigma Condors: Short Calls 2 standard deviations above the market and the Long Calls the next strike price higher; Short Puts 2 standard deviations below the market and the Long Puts the next strike price lower. This is called 2 Sig Iron Condors. I have developed a tactic to make weekly profits in spite of the huge daily Up and Down movements in the SPX. SelfAdapSPXweeklyVLTy is the name of my software which I use to generate monthly income. The software described in this book uses only SPX for the options because I discovered that when I used other underlying stocks or indices such as Google and SPY, SPX usually finished best. This book describes how to use the TradeMonster real-time SPX quotes for computing the 2 sig Condors used in my Software: SelfAdapSPXweeklyVLTy. Trade Monster's affiliate OptionsHouse can be used for Weekly Options trading if you have a minimum of \$2,000 in the account. I use 1/4 of the capital = \$500 for Margin to generate about \$100 for the week or \$400 for the Month. In other words you get 90% return per month on \$500 margin. Remember the weekly in-out trades should be no more than 2 per week to avoid being designated a day trader by your broker which requires a minimum of \$25,000 in your account.
