Prevention Effectiveness Anne C. Haddix 2003 As public accountability has increased and resources have become scarcer, public health, like clinical medicine, has been forced to re-examine the benefits and costs of its activities. Decision and economic analysis are basic tools in carrying out that mission. These methods have become standard practice in clinical medicine and health services research. This book , now in its second edition, was written in an effort to apply and adapt that experience with public health situations. The book was originally written to introduce Centers for Disease Control and Prevention staff to the concepts of decision and economic analysis, to provide guidance on methods to maximize comparability of studios, and to provide access to frequently used reference information. It has been adapted to meet the needs of scientists and managers in state and local health departments and managed care organizations as well as students in schools of public health and clinicians for an introductory text --a text that shows how these

methods can be applied in population-based practice, to facilitate better comparability of studies, and to solidify understanding of the scientific basis for use of these tools in decision making. Decision makers will learn how these studies are conducted so they can be critical consumers-- understanding the strengths and limitations- and apply findings to policy and practice. The second edition updates and expands upon the standard methodology for condcuting prevention effectiveness analyses. Each chapter has been revised or re-written. The chapters on measuring effectiveness, decision analysis, and making information useful for decision makers as well as several appendices are entirely new.

Washington State Notary Public Guide Washington State Department 2019-04-06 The Department of Licensing has worked to keep the notary public application process as simple as possible. A prospective notary need only submit a complete application, proof of a \$10,000 surety bond, and appropriate fees to the Department of Licensing in order to begin the process. Once an applicant has completed all application requirements and proven that he or she is eligible, the Department will have a new certificate of commission mailed out promptly. New in 2018, notaries public can also apply for an electronic records notary public endorsement, which allows the notary to perform notarial acts on electronic documents as well as paper documents. The

application process is similar to the application process for the commission, and can be done at the same time or separately.

Every Assistance & Protection Jane Doulman 2008 Every Assistance and Protection is the first book presenting an in-depth history of the Australian passport. In charting the development of the passport from its early beginnings to its present form, the book traverses changes in government policy and social history from the early 19th century to the modern era. It shows how the Australian passport evolved from a signifier of British nationality into a badge of membership of one of the most multicultural countries in the world. The book explores the landmark events in this history: the great 19th century diasporas, resulting from relaxation of official controls on the movement of people; the early passport regime regulating the movement of "ticket-of-leave" convicts; the establishment of the centralised passport system during World War I; the enactment of the first passport legislation for the Commonwealth, The Passports Act 1920, and the reaction of some Australians who felt the new law infringed the liberties of the British subject; changes to the laws in 1938 such that possession of a passport was no longer mandatory for an Australian to travel, though still a practical necessity; the use of the government's discretionary power to cancel or withhold passports to inhibit the movement of individual communists; the establishment of Australian citizenship in 1948 - the basis for possession of an Australian passport; the removal of the word "British" from the cover in 1967; the effects of globalisation and heightened security in the late 20th and early 21st century. It also touches on the lives of individuals: boxer Les Darcy, journalist Wilfred Burchett, and General Sir Thomas Blamey, are among the many Australians featuring in these pages. The book is based on an exhaustive examination of hitherto unexamined primary sources of many government departments, including the Departments of External Affairs, the Prime Minister's, the

The powers and responsibilities of a notary are described in the Missouri Revised Statutes Chapter 486. The provisions of this statute are included in this handbook for your convenience. In addition to the statutes, this resource provides general information related to your role as a notary, a glossary of important terms and copies of key application forms to assist you in the administration of your notary duties.

Management of the Department of State, Office of Passport Services Needs to be Improved United States. General Accounting Office 1981 GAO reviewed the Department of State's Office of Passport Services, the Travel Document Issuance System (TDIS), the Passport Files Miniaturization (PFM) system, passport records storage, passport fraud programs, special handling fees, and the Passport Lookout System. The objective of the review was to evaluate the effectiveness of these functions within the Department. TDIS, the Department's new computerized system for issuing passports, is plagued by deficient planning. TDIS will cost between \$12 to \$15 million over the next 4 years, and management needs to take on more comprehensive planning. The PFM system is another problem area that has presented difficulties to the passport management staff. Because of technical complications within the system, operational performance troubles, and inadequate management attention to the new file system, a severe backlog of work has developed, clogging the system with over 2 million passport applications. Still another related records management problem is the storage of original passport records. Costing over \$200,000 each year, the Department has over 140 million passport documents in storage. One of the most severe problems facing the Department is that of passport fraud. Although the Department discovered 1,002 cases of passport fraud in fiscal

year 1980, it has been presumed that this is just the tip of the iceberg. GAO identified two operational areas of concern that are performed as daily passport functions: (1) the inequitable provision for the special handling of passports that require fast delivery because of urgent departure dates or because of requests by passport applicants; and (2) the operation of the Passport Lookout System, a system that is used to screen passport applications for administrative, law enforcement, and national security purposes. GAO believes that the system is basically sound but is experiencing a number of difficulties.

State Department Pervasive Passport Fraud Not Identified, But Cases of Potentially Fraudulent and High-Risk Issuances Are Under Review United States Government Accountability Office 2015-01-01 According to agency officials and guidance posted on State's public website, applicants can apply for a U.S. passport in one of three ways: in person at an acceptance facility, by mail (for renewal applications), or at a passport facility that offers acceptance services (typically expedited applications). Applicants submit documents, such as a birth certificate or driver's license, to passport acceptance agents to provide evidence of citizenship, or noncitizen nationality, and proof of identity. The acceptance agents are to watch the applicant sign the application, review submitted documents for completeness, and check for application inconsistencies. For example, acceptance agents are to assess whether photographs and descriptions in the identification documents match the applicant.

Department of State United States. Government Accountability Office 2009 A genuine U.S. passport is a vital document, permitting its owner to travel freely in and out of the United States, prove U.S. citizenship, obtain further identification documents, and set up bank accounts, among other things.

Unfortunately, a terrorist or other criminal could take advantage of these benefits by fraudulently obtaining a genuine U.S. passport from the Department of State (State). There are many ways that malicious individuals could fraudulently obtain a genuine U.S. passport, including stealing an American citizen's identity and counterfeiting or fraudulently obtaining identification or citizenship documents to meet State requirements. GAO was asked to proactively test the effectiveness of State's passport issuance process to determine whether the process is vulnerable to fraud. To do so, GAO designed four test scenarios that

simulated the actions of a malicious individual who had access to an American citizen's personal identity information. GAO created counterfeit documents for four fictitious or deceased individuals using off-the-shelf, commercially available hardware, software, and materials. An undercover GAO investigator then applied for passports at three United States Postal Service (USPS) locations and a State-run passport office.

Border Security United States Government Accountability Office 2017-09-15 Travel documents are often used fraudulently in attempts to enter the United States. The integrity of U.S. passports and visas depends on the combination of well-designed security features and solid issuance and inspection processes. GAO was asked to examine (1) the features of U.S. passports and visas and how information on the features is shared; (2) the integrity of the issuance process for these documents; and (3) how these documents are inspected at U.S. ports of entry. We reviewed documents such as studies, alerts, and training materials. We met with officials from the Departments of State, Homeland Security, and Commerce's National Institute of Standards and Technology, and U.S. Government Printing Office, and with officials at seven passport offices, nine U.S. ports of entry, two U.S. consulates in Mexico, and two Border Crossing Card production facilities.

Department of State Gregory D. Kutz 2009-06 A genuine U.S. passport permits its owner to travel freely in and out of the U.S., prove U.S. citizenship, obtain further identification documents, and set up bank accounts, among other things. The auditor was asked to proactively test the effectiveness of State's passport issuance process to determine whether the process is vulnerable to fraud. The investigation shows that terrorists or criminals could steal an American citizen's identity, use basic counterfeiting skills to create fraudulent documentation for that identity, and obtain a genuine U.S. passport from the Dept. of

State. The auditor conducted 4 tests simulating this approach and was successful in obtaining a genuine U.S. passport in each case.

Passport Entanglements Nicole Constable 2022 "Passport Entanglements examines the problems with documents issued to Indonesian migrant workers in Hong Kong. Focusing on the politics and inequalities embedded in passports, anthropologist Nicole Constable looks at how these instruments determine legal status and prescribe rights. The book explores the larger role that

passports and other types of documentation play in gendered migration, precarious labor, and bureaucracy as they reinforce violent structures on often already vulnerable women. Constable finds that new biometric technologies and surveillance do not lead to greater protection, security, or accuracy, but rather produce new vulnerabilities and reproduce old ones"--
