A Different Paradigm in Music Education David A Williams 2019-03-13 A Different Paradigm in Music Education is a "let's consider some possibilities" book. Instead of a music methods book, it is a look at where the music education profession is and how music teachers might improve what it is we do. It is about change. It is about questioning the current music education paradigm, especially regarding its exclusive role as the only model. The intent is to help pre-service and in-service music educators consider new modes of pedagogical thought that will allow us to broaden our reach in schools and better help students develop as creative musicians across their lifespan. The book includes an overview of several opportunities and course examples that would make music education more relevant and meaningful, especially for students that are not interested in our traditional performance offerings. The author wishes to stimulate discussions, with the goal for the music education profession to grow and mature.

Attracting Science and Mathematics Ph.D.s to Secondary School Education Center for Education 2000-09-16 The National Research Council conducted a study to identify a set of incentives that state governments and local school districts can use to attract Ph.D. scientists and mathematicians to secondary school teaching positions. This project investigated the career ambitions of Ph.D.s in the physical and life sciences through focus groups and a national survey to determine the kinds of work conditions and compensation packages that would induce them to take positions teaching physics, chemistry, biology, and various electives in public high schools or positions developing secondary school science and mathematics curricula. The study conducted interviews with Ph.D.s who are already teaching in secondary schools to ascertain information from their experiences, with local school district administrators to assess what they are realistically willing to offer Ph.D. scientists to attract them, and with higher education administrators to explore programmatic changes they would need to institute to provide Ph.D.s with skills tailored to secondary school teaching. These investigations led to this report which describes the incentives local school districts could use in establishing pilot programs in this area.

Ringo Starr and the Beatles Beat Alex Cain 2016-10-28 With over 80 years drumming experience between them, Liverpool drummers Alex Cain and Terry McCusker explore the percussive elements of the Beatles songbook, providing intuitive descriptions and detailed notation of the drumming and percussion in every original Beatles release. Scratch beneath the surface of the Beatles' musical output to discover percussive layers which display just how much care and attention to detail John, Paul, George and Ringo put into their music. With comprehensive song by song analysis, there's something for the drummer and non-drummer alike - from the tentative, nervous recording of Love Me Do at Abbey Road in 1962, to the final recording of I Me Mine by George, Paul and Ringo at Apple Studios in 1970. Discover how Ringo's sympathetic and instinctive drumming interacted with the personalities of his bandmates and recording engineers to shape the Beatles' beat. Terry's recollections of witnessing four lads in the famous Cavern Club provide a focus on how the 'beat' in Merseybeat altered the musical and cultural landscape forever, while Alex's experiences as a sound engineer shed light upon the studio experimentation that enhanced the Beatles' sound. The shortcomings of Pete Best and the reasons he was forced to relinquish the Beatle drum stool and Ringo's ascendancy are also discussed in detail. Foreword by Don Powell of Slade.
