Frightening Light Nick Arnold 1999 What stops your eyeballs from falling out? Why can dead bodies make ghostly glowing lights? How can a laser beam sizzle human flesh? This title answers these questions.

In the Danger Zone Stefan Gates 2008-09-04 Award-winning food writer Stefan Gates has travelled the world to investigate how people cook, eat and survive in extreme conditions for the acclaimed BBC television series *Cooking in the Danger Zone*. He drank radioactive wine with babushkas in Chernobyl, ate fat-tailed sheep with Taliban warlords in Afghanistan, yak's penis with Chinese Communists, civet cat with the Karen rebels deep in the Burmese jungle and rotting walrus with the Inuit of the Canadian Arctic. In this book Stefan takes us on an extraordinary personal journey as he tries to understand a world in crisis, and meets people caught up in war, poverty and environmental disasters. This behind-the-scenes account is hugely entertaining and thought provoking, blending war and food, ethics and emotions, comedy and tragedy.

The Language Instinct Steven Pinker 2010-12-14 The classic book on the development of human language by the world's leading expert on language and the mind. In this classic, the world's expert on language and mind lucidly explains everything you always wanted to know about language: how it works, how children learn it, how it changes, how the brain computes it, and how it evolved. With deft use of examples of humor and wordplay, Steven Pinker weaves our vast knowledge of language into a compelling story: language is a human instinct, wired into our brains by evolution. The *Language Instinct* received the William James Book Prize from the American Psychological Association and the Public Interest Award from the Linguistics Society of America. This edition includes an update on advances in the science of language since *The Language Instinct* was first published.

Bloomin' Rainforests Anita Ganeri 2019-08 CELEBRATING 20 YEARS OF HORRIBLE GEOGRAPHY! Discover where in the world you can hide from vicious vampire bats, spot spiders the size of dinner plates and peer down the tallest trees in the planet. The Horrible Science of Everything Nick Arnold 2017-02-02 Taking a journey from the very small, to the very big, readers are taken on a tour of everything in science from the smallest thing ever to the horribly huge universe. And it's all in full colour and in new flexi-bound paperback format!

Warriors Terry Deary 2007-01-01 Terry Deary tells the terrible truth about fighting men from around the world, including Roman soldiers, Greek soldiers, Vikings, Samurai and native American warriors.

The Extraordinary Cookbook Stefan Gates 2011-09 Provides recipes, including snacks and starters for communal dipping, main courses to get messy with, and interactive meals.

Pattern Recognition William Gibson 2004-06-24 *Pattern Recognition* - a pulsating techno-thriller by William Gibson, bestselling author of *Neuromancer* Cayce Pollard has been flown to London. She's a 'coolhunter' - her services for hire to global corporations desperate for certainty in a capricious and uncertain world. Now she's been offered a special project: track down the makers of the addictive online film that's lighting up the 'net. Hunting the source will take her to Tokyo and Moscow and put her in the sights of Japanese computer crazies and Russian Mafia men. She's up against those who want to control the film, to own it - who figure breaking the law is just another business strategy. The kind of people who relish turning the hunter into the hunted . . . William Gibson is a prophet and a satirist, a black comedian and an outstanding architect of cool. Readers of Neal Stephenson, Ray Bradbury and Iain M. Banks will love this book. *Pattern Recognition* is the first novel in the Blue Ant trilogy - read *Spook Country* and *Zero History* for more. 'A big novel, full of bold ideas . . . races along like an expert thriller' GQ 'Dangerously hip. Its dialogue and characterization will amaze you. A wonderfully detailed, reckless journey of espionage and lies' USA Today 'A compelling, humane story with a sympathetic heroine searching for meaning and consolation in a post-everything world' Daily Telegraph Idris is a gripping techno-thriller by William Gibson, bestselling author of *Neuromancer* 'Fast, witty and cleverly politicized' Guardian

Measly Medicine Nick Arnold 2006 A romp through the history of healthcare, this title includes chapters on ancient medicine - Stone Age trepanning, Chinese medicine, Romans, Greeks. It covers such topics as the dodgy diagnostics of the Middle Ages; the bloody operations before anaesthetics and hygiene were implemented; Florence Nightingale's nursing revolution and more.

The Death of Expertise Tom Nichols 2017 People are now exposed to more information than ever before, provided both by technology and by increasing access to every level of education. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. As Tom Nichols shows in *The Death of Expertise*, this rejection of experts has occurred for many reasons, including the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment machine. Paradoxically, the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. Nichols has deeper concerns than the current rejection of expertise and learning, noting that when ordinary citizens believe that no one knows more than anyone else, democratic institutions

themselves are in danger of falling either to populism or to technocracy-or in the worst case, a combination of both. The Death of Expertise is not only an exploration of a dangerous phenomenon but also a warning about the stability and survival of modern democracy in the Information Age.

Blood, Bones and Body Bits Nick Arnold 2014-04-01 HORRIBLE SCIENCE: BLOOD, BONES AND BODY BITS is a bone-chilling book of bodies to make kids squeal! Peek inside to discover all the squishy secrets of your body — including the nasty bits nobody wants to tell you! Find out what happens when a boil bursts. See what lives in your eyelashes. Gulp at the workings of your disgusting digestion. And discover why corpses need haircuts even after they're dead. This book of squishy, squelchy and amazing things lets children get the inside story on their insides — if they dare!

Disgusting Digestion Nick Arnold 2014-01-02 HORRIBLE SCIENCE: DISGUSTING DIGESTION is full of the stinkiest, smelliest, most goeey and revolting facts about the human digestive system. Readers can not only find out exactly what goes on inside their stomachs when they eat, but also: which people used to eat their dead relatives, how food can painfully poison you, what mysterious minerals are found in school dinners and the sickening science of spew. Redesigned in a bold, funky new look for the next generation of HORRIBLE SCIENCE fans.

Big Girls #1 Jason Howard 2020-08-12 When men become giant monsters hellbent on destroying the world, only girls can stop them—BIG GIRLS. Meet Ember—she writes poetry, loves to read, and she's a 300-foot-tall full-time monster killer! She and the other big girls are all that stand in the way of our world's complete annihilation! Critically acclaimed artist JASON HOWARD (TREES) takes full creative control as the writer and artist of a tale that's a cross between JOHN WICK and GODZILLA by way of HBO's GIRLS.

Space, Stars and Slimy Aliens Nick Arnold 2018-03 HORRIBLE SCIENCE: SPACE, STARS AND SLIMY ALIENS is a bursting space-hopping book of stunning science. Zoom to the stars with Oddblob the alien, and take part in a spacewalk that's out of this world and learn what the moon smells like. Find out all the horrible facts about space like which astronomers killed people and why space makes your guts explode! Zoom around the planets, learn which galaxies eat each other, and see if you can spot a little green man while you're there!

A Duck Called Brian Al Murphy 2021

Sophie's World Jostein Gaarder 2007-03-20 One day Sophie comes home from school to find two questions in her mail: "Who are you?" and "Where does the world come from?" Before she knows it she is enrolled in a correspondence course with a mysterious philosopher. Thus begins Jostein Gaarder's unique novel, which is not only a mystery, but also a complete and entertaining history of philosophy.

A Sting in the Tale Dave Goulson 2014-04-29 FOLLOWING IN THE FOOTSTEPS OF GREAT NATURE WRITERS SUCH AS E.O. WILSON AND CHARMING MEMOIRS LIKE GERALD DURRELL'S MY FAMILY AND OTHER ANIMALS, THIS FASCINATING BOOK WILL ALTER THE WAY WE THINK ABOUT BUMBLEBEES. Dave Goulson became obsessed with wildlife as a small boy growing up in rural Shropshire, starting with an increasingly exotic menagerie of pets. When his interest turned to the anatomical, there were even some ill-fated experiments with taxidermy. But bees are where Goulson's true passion lies—the humble bumblebee in particular. Once commonly found in the marshes of Kent, the English short-haired bumblebee went extinct in the United Kingdom, but by a twist of fate still exists in the wilds of New Zealand, the descendants of a few pairs shipped over in the nineteenth century. Dave Goulson's passionate quest to reintroduce it to its native land is one of the highlights of a book that includes original research into the habits of these mysterious creatures, history's relationship with the bumblebee, and advice on how to protect the bumblebee for future generations. One of the United Kingdom's most respected conservationists and the founder of the Bumblebee Conservation Trust, Goulson combines lighthearted tales of a child's growing passion for nature with a deep insight into the crucial importance of the bumblebee. He details the minutiae of life in the nest, sharing fascinating research into the effects intensive

farming has had on our bee population and the potential dangers if we are to continue down this path.

Fartology Stefan Gates 2018-11-01 Stefan Gates asks and answers all the questions about farts, so that you don't have to. What is a fart? Do all creatures fart? Why do farts smell? Why do we find them so embarrassing... and so darned funny?! Broadcaster and obsessive fartologist Stefan Gates tackles these pressing issues in *Fartology*, the first ever book to take a comprehensive, scientific look at the body's extraordinary methane-making abilities. Stefan looks at the journey from food to fart; the weird science behind intestinal gas; the sounds, smells and all things in between. With farty recipes, musings on the greatest farters in history, farts in literature, and fart euphemisms *Fartology* offers mind-blowing, trouser-exploding fun for all the family.

Horrible Science: Vicious Veg Nick Arnold 1998-11 If you think you can stomach the sick side of science, read on as we dig up the dirt on the world of plants. Find out when a fruit is really a vegetable, how plants keep us from suffocating and what stops trees from falling over. The book includes fact files, quirky quizzes and teacher tests.

Gastronaut Stefan Gates 2006 An irreverent journey through the exotic and bizarre regions of the culinary world begins with the author's vow to enjoy the portion of his life devoted to food and considers such offbeat topics as the dishes most likely to cause gastrointestinal upset, the elements of a bacchanalian orgy, and the prospects for teaching one's grandma to suck eggs. Original. 50,000 first printing.

Nasty Nature Nick Arnold 2014-06-01 All the animals in HORRIBLE SCIENCE: NASTY NATURE are the deadliest, most disgusting and nastiest things that nature has to offer! So only read on if you're ready to find out: how vampire bats slurp blood, what a singing gorilla sounds like, how to dodge a man-eating tiger and which Japanese fish dish can kill you.

Dogology Stefan Gates 2021-11-11 Dogology explores the bizarre and very funny world of canine science. Vital questions answered include: Why do dogs fart (but cats don't)? Do dogs feel guilt, love, happiness or jealousy? What does it mean when a dog wags its tail more to the right or the left? Why do dogs poo with their bodies aligned north-to-south? Do dogs dream? If so, what about? How do dogs smell epilepsy, cancer and human sadness? How many hairs are there on your dog? What does your dog hear when you talk? Packed with fascinating facts, quirky scientific revelations and weird stories about our furry friends, Dogology offers a secret glimpse inside the canine body and mind.

Painful Poison Nick Arnold 2009-03-01 Discover how can you turn your brother into a zombie slave and why you are breathing poison right now! With a fantastic new cover look and extra horrible bits at the back of the book, this best-selling title is sure to be a huge hit with a new generation of Horrible Science readers.

I Don't Like Poetry Joshua Seigal 2016-09-22 Shortlisted for the 2017 Laugh Out Loud Awards - the UK's only prize for funny children's books. #LOLLIES2017 Packed full of silly, funny, or downright hilarious poems (with a few serious ones mixed in) this brilliant collection from exciting young poet, Joshua Seigal is perfect for fans of Michael Rosen and anyone else who needs a giggle. If you like poetry, you'll like this book. And if you don't like poetry you'll LOVE it! 'When you read this book, the windows will burp and the grass will turn blue. That's how magic these poems are.' Michael Rosen 'If ... you still think "I don't like poetry," this might be the collection for you: Joshua Seigal's very imaginative and wonderful collection.' Nicolette Jones, The Times With poems on every topic from the power of books to the joys of fried chicken, this collection a fabulous mix of Joshua Seigal's subversive humour and insight into the world of children. If you don't like poetry after reading this, there's probably something wrong with you! Book band: Grey Ideal for Age 8 - 9

The Fearsome Fight for Flight Nick Arnold 2004 Science with the squishy bits left in! 'The Fearsome Fight for Flight' will send you sky-high! Are you in a flap to discover who put a parachute on a puppy? Why scientists fire dead birds from cannon? What happened to the world's first flying sheep? If you think you can stomach the sick side of science, then read on as we go plane crazy. Laugh at some seriously silly flying stunts, find out which scientist was blown up in a

balloon, and learn how to build a world-beating plane. With fantastic fact files, quirky quizzes and crazy cartoons 'The Fearsome Fight for Flight' is a real high-flier! Science has never been so horrible!

Bulging Box of Books Nick Arnold 2009-08-16 Twenty titles from the best-selling series, presented in a bulging boxed set. Features all the best-selling Horrible Science titles from A to Z ... well, from Blood, Bones and Body Bits to Vicious Veg.

Science You Can Eat Stefan Gates 2019-06-11 Discover the incredible, edible science that happens every time you cook, bake, or eat with this children's book that is part-cookbook, part-science reference. This exciting kids' book tackles all the tasty science questions you have about food - plus plenty more that you hadn't even thought of! Science You Can Eat will transform your kitchen into an awesome lab through 20 fun food experiments. This quest of gastronomic wonder is so much more than just another science book for kids! It explores the science of food by asking questions you're hungry to know the answers to and putting them to the test through fun experiments. Cooking is just delicious chemistry, and the science experiments in this adorable kids cookbook will prove it. Once you understand science, you understand food. Find out why popcorn goes "pop" as you test it out for yourself. Explore how taste is affected by smell, know if carrots really can turn you orange, and finally discover whether eating insects is the future of food. There is a fantastic mix of fun facts and knowledge, context, and science experiments for kids in this educational book. The experiments are easy to execute at home with things you have around the kitchen. The instructions are detailed but easy to understand, so some kids could even adventure solo through its pages. Enjoy the delightful weirdness of tricking your taste buds, making slime taste delicious, investigating some of the strangest flavors around, and extracting iron from your cereal! Science You Can Eat helps your little one understand what's happening with their food and why. Each page is guaranteed to leave you hungry for more - we'd wager even adults will learn a thing or two from this culinary escapade. Explore, Experiment, And Learn! Explore the world of weird, mind-blowing, and often gloriously revolting (but tasty) science behind the food we eat; from why onions make us cry to the sticky science of chewing gum. Packed with activities for kids that allow you to use the power of science in the most delicious way. You'll concoct color-changing potions, make scrumptious ice-cream in an instant, and much, much more. Embark on this incredible edible adventure with TV presenter Stefan Gates AKA "The Gastronomer" and turn the things we eat from the ordinary into the extraordinary. Some of the food science you'll learn about: - Unusual foods - The world's smelliest fruit - Salt and other marvelous minerals - Ways of cooking - Drinks that glow and so much more!

The Devil's Dictionary Ambrose Bierce 1911 Bierce exploits the comic potential of the dictionary format to mock the doublespeak prominent in post-Civil War politics. Using short, pithy entries on a variety of subjects, this "reference book" inverts the meaning of words, skewers popular hypocrisy and showcases Bierce's dark humor. Many of these entries began as newspaper columns Bierce wrote in the 1870s. One hundred years later, it is clear that the America he lampoons is not that different from our own.

Killer Energy Nick Arnold 2014 In 'Killer Energy' readers discover why space loos spray out frozen pee and 'Shocking Electricity' exposes how Hammerhead sharks use electricity to track its victims. These two titles contain fantastic fact files and quirky quizzes, teacher tests and crazy cartoons.

Horrible Science: Bulging Brains Nick Arnold 2014-05-01 Bulging Brains is full of the most squishing, gooey and stinky facts about the human brain! It looks like a huge grey bogey or something you'd step in by mistake - but your incredible brain holds all your knowledge, dreams and feelings. Redesigned in a bold, funky new look for the next generation of HORRIBLE SCIENCE fans.

What We Don't Talk About When We Talk About Fat Aubrey Gordon 2020-11-17 From the creator of Your Fat Friend and co-host of the Maintenance Phase podcast, an explosive indictment of the systemic and cultural bias facing plus-size people. Anti-fatness is everywhere. In What We

Don't Talk About When We Talk About Fat, Aubrey Gordon unearths the cultural attitudes and social systems that have led to people being denied basic needs because they are fat and calls for social justice movements to be inclusive of plus-sized people's experiences. Unlike the recent wave of memoirs and quasi self-help books that encourage readers to love and accept themselves, Gordon pushes the discussion further towards authentic fat activism, which includes ending legal weight discrimination, giving equal access to health care for large people, increased access to public spaces, and ending anti-fat violence. As she argues, "I did not come to body positivity for self-esteem. I came to it for social justice." By sharing her experiences as well as those of others—from smaller fat to very fat people—she concludes that to be fat in our society is to be seen as an undeniable failure, unlovable, unforgivable, and morally condemnable. Fatness is an open invitation for others to express disgust, fear, and insidious concern. To be fat is to be denied humanity and empathy. Studies show that fat survivors of sexual assault are less likely to be believed and less likely than their thin counterparts to report various crimes; 27% of very fat women and 13% of very fat men attempt suicide; over 50% of doctors describe their fat patients as "awkward, unattractive, ugly and noncompliant"; and in 48 states, it's legal—even routine—to deny employment because of an applicant's size. Advancing fat justice and changing prejudicial structures and attitudes will require work from all people. What We Don't Talk About When We Talk About Fat is a crucial tool to create a tectonic shift in the way we see, talk about, and treat our bodies, fat and thin alike.

Fads and Fallacies in the Name of Science Martin Gardner 2012-05-04 Fair, witty appraisal of cranks, quacks, and quackeries of science and pseudoscience: hollow earth, Velikovsky, orgone energy, Dianetics, flying saucers, Bridey Murphy, food and medical fads, and much more.

Ireland Terry Deary 2009 Readers can discover all the foul facts about Ireland, including why wax models were captured and made Prisoners of War, which warriors went to battle naked, and how to make yourself invisible. With a bold, accessible new look and a heap of extra-horrible bits, these bestselling titles are sure to be a huge hit with yet another generation of Terry Deary fans.

Deadly Diseases (Set) 2021-12-15 Throughout human history, people have been battling illnesses. Smallpox spread through cities in ancient times. The bubonic plague in the Middle Ages killed millions around the world. The COVID-19 pandemic disrupted life across the globe in 2020. At the same time, tragic events like these have led to amazing improvements in medicine. Deadly Diseases helps readers examine the history of these diseases and the science behind how they work. It also explores treatments and vaccines that have saved countless lives. Aligned to Common Core Standards and correlated to state standards. Core Library is an imprint of Abdo Publishing, a division of ABDO.

Horrible Science: Evil Inventions Nick Arnold 2014-05-01 Evil Inventions is full of the most gruesome gadgets and murderous machines ever created. Discover why someone invented the bottom-stabbing bike saddle and why you would need a toilet snorkel! Redesigned in a bold, funky new look for the next generation of Horrible Science fans.

Horrible Science: Ugly Bugs Nick Arnold 2014-01-09 HORRIBLE SCIENCE: UGLY BUGS lifts up the stone on the creepy-crawly world of insects. If you're brave enough to look, discover what slugs do with their slime, why flies throw up on your tea and how a preying mantis bites its victim's head off! Redesigned in a bold, funky new look for the next generation of HORRIBLE SCIENCE fans.

Infinite Jest David Foster Wallace 2009-04-13 A gargantuan, mind-altering comedy about the Pursuit of Happiness in America Set in an addicts' halfway house and a tennis academy, and featuring the most endearingly screwed-up family to come along in recent fiction, Infinite Jest explores essential questions about what entertainment is and why it has come to so dominate our lives; about how our desire for entertainment affects our need to connect with other people; and about what the pleasures we choose say about who we are. Equal parts philosophical quest and screwball comedy, Infinite Jest bends every rule of fiction without sacrificing for a moment its own entertainment value. It is an exuberant, uniquely American exploration of the passions that make

us human - and one of those rare books that renew the idea of what a novel can do. "The next step in fiction...Edgy, accurate, and darkly witty...Think Beckett, think Pynchon, think Gaddis. Think." --Sven Birkerts, *The Atlantic*

Catology Stefan Gates 2021-11-11 *Catology* explores the bizarre and very funny world of feline science. Vital questions answered include: Why do cats have a secret second nose? Why don't cats fart (but dogs do)? Do cats feel guilt, love, happiness or jealousy? Why are cats' tongues covered in microscopic hooks? Do cats always land on their feet? Why are cats so scared of cucumbers? Why do cats purr both when happy and when distressed? How do you interpret cat language? Packed with fascinating facts, quirky scientific revelations and weird stories about our

furry friends, *Catology* offers a secret glimpse inside the feline body and mind.

Ugly Bugs Nick Arnold 2014-06-01 HORRIBLE SCIENCE: UGLY BUGS lifts up the stone on the creepy-crawly world of insects. You don't have to go very far to find them. Pick up any stone, look into any corner, and a hideous creepy-crawly thing is bound to squirm out! Huge hairy spiders! Wriggly centipedes! Slimy slugs and snails! Most frail folk will scream and run away. But if you're brave enough to look closer, then it's time to discover what slugs do with their slime, why flies throw up on your tea, how insects drink your blood and how a praying mantis bites its victim's head off!
